Our production sites

Headquartered in Logroño, Spain, Garnica has six production sites, five in Spain and one in France. A second French production site will come online in 2021.

Logroño.

Corporate headquarters, centralizing and optimizing services.

Baños de Río Tobía I.

The first and most versatile facility, manufacturing all product types.

Baños de Río Tobía II.

Specializes in large-format panels.

Fuenmayor.

Specializes in value-added products.

Valencia de Don Juan.

Garnica's largest and most efficient facility, featuring Europe's biggest press.

Maderas de Llodio.

A 2018 acquisition specializing in radiata pine products.

Samazan.

Focused on production of poplar veneers for use by other Garnica facilities.

Troyes.

New production site scheduled to come online in 2021.

A worldwide reference in the plywood industry

We use **locally sourced** wood from **sustainable** forests and plantations.

- Our raw material, wood, plays an essential role in a **circular economy**. It's renewable, recyclable, reusable and biodegradable.
- Our main wood source, poplar, captures more than **12 tons of CO₂/year** per hectare and grows **four times faster** than tropical species.

We **innovate** in products and services and emphasize **ongoing improvement** throughout our organization.

- Our **nursery** features sophisticated clone research and development, constantly improving our poplar timber.
- Our **quality** control department ensures that products meet the highest standards and obtain all relevant certifications.

We offer **solutions** that are **tailored** to each client based on our **extensive product range**.

- Our **industrial customization** services provide the flexibility and adaptability to respond to diverse client needs.
- At the same time, we're able to produce **large product volumes** efficiently and competitively.

With the support of our valued clients, we've maintained double-digit annual **growth** for over 20 years.

- Six production facilities.
- More than 1,200 employees.
- 360,000 m³ of production capacity.
- Sales of 300 million dollars.
- 93% of production exported to over 45 countries.

Applications

Our extensive product range enables diverse uses across multiple markets.

RV

Furniture

Decoration

Construction

Marine

Products

Our lightweight panels are notable for an array of exceptional properties including consistent quality, stability, and machinability.

Innovation that challenges flames

100% fire rated, modified plywood with B-s1, d0 and ASTM E84 certification for public building projects.

Resistance that challenges nature

Ultra-durable, fungal and insect resistant plywood for exterior construction, marine applications, furniture, and decoration.

ultralight

Lightness that challenges the impossible

Ultralight, high insulation sandwich panels for RVs, furniture, doors, roofs, and decorative interior paneling.

efficiency

Versatility that challenges creativity

Highly versatile, lightweight, poplar plywood suitable for countless applications.

performance

Quality that challenges perfection

Lightweight, premium poplar plywood for demanding applications, e.g. the caravan and maritime industries.

elegance

Beauty that challenges the ordinary

Decorative, premium plywood with natural timber surfaces and a poplar core for decoration and furniture.

reinforced

Strength that challenges imagination

Poplar plywood reinforced with eucalyptus for decoration, furniture and wood flooring support.

tradition

Tropical spirit that challenges the established

Plywood with poplar core and exotic timber faces for diverse applications.

Efficiency built in

Structural, insulated, high-performance sandwich panels for construction use.

European Radiata Pine Plywood

Sustainable Radiata Pine plywood, ideal for use in both construction and decoration.

Finishes

Outstanding finishes bring added value to our products, ensuring seamless integration on any project.

Varnish
